Claim 20 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 20 depends upon canceled claim 19.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18, 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al in view of Friedson U.S. Patent 6,332,307.

Yamaguchi disclosed a machine comprising a seat (2); a drive mechanism (16) that imparts a swinging motion to the seat; the seat has a saddle shape; an elevator (168-170) provides to adjustability to the height of the seat and repeatedly raised and lowered the seat during operation of the drive mechanism; the swinging motion comprising three degrees of freedom of movement in the form of a longitudinal reciprocating linear motion and reciprocating pivoting motions around a fore-aft (Figs. 3-5) and transverse axes (Fig. 7-8). It is noted that the machine of Yamaguchi et al failed to teach the expandable and contractible member provided on a seating surface of the seat as set forth in claims 1-12 and 19. However, Friedson disclosed a saddle

Art Unit: 3711

assembly comprising an expandable and contractible member in a form of an air bladder (25) (see Fig. 7) providing on each side of the saddle which inherently including positions in oppose the thighs and knees of the user; and a mechanism (26) for expanding and contracting the member (see column 4, lines 64-67 and column 5, lines 1-9). Therefore, it would have been obvious to one of ordinary skill in the art to modify the machine of Yamaguchi et al by integrally adding the bladders as taught by Friedson for the purpose of providing comfort for the user as well as enhancing the motion of the seat during operation.

Response to Arguments

In response to applicant's argument concerning the combination of Yamaguchi and Friedson failed to teach a mechanism that "repeatedly" expands and contracts the expandable and contractible member as recited in claims 1 and 18, the term "repeatedly" does limit as to **how or how often, and/or when** the mechanism "repeatedly" expands and contracts the member. It is submitted that the valve (26) of Friedson is conceivably capable of being repeatedly inflated (expanding) and deflated (contracting) the bladder (25). Such interpretation of Friedson clearly meets the claimed invention in the above explanation.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
